“FULL” KIT INSTALLATION

WARNING:

MAKE SURE ELECTRICAL POWER TO THE GAME IS OFF BEFORE STARTING THE KIT INSTALLATION.

CABINET PREPARATION

1. Remove the marquee glass, old marquee overlay, and the old cabinet graphics.
2. Disconnect and remove the old printed circuit board(s) from the cabinet.
3. Remove or open the control panel, and disconnect and remove the buttons and joystick(s) from the control panel.
4. Remove any covering from the control panel overlay, and then remove the control panel overlay.
5. Place the Drill Hole Template (included in this manual) over the control panel to determine where any new holes should go. Center punch any needed new holes on the control panel.
6. Cut out the new holes using a 1-3/16" hole saw.
7. If there is an additional control panel cover (such as plastic or lexan) that will be utilized, cut any additional holes using the same template.
8. Plug up unused holes with wood dowel (1-1/8" diameter), being careful to sand any rough edges, or use available button plugs.

KIT INSTALLATION

Control Panel Overlay Installation (See Figure 1)

9. The control panel overlay in the kit is oversized to accommodate most control panel sizes. Center the overlay on the control panel, leaving some excess material at the edges.

10. Remove the protective backing from the overlay and press it down on the control panel, keeping it properly aligned. Press it down firmly, smooth out any bubbles, and press it over the edges.

11. Trim any excess from the overlay. Place the drill hole template on top of the overlay, aligning it with the joystick holes. Pierce through the overlay at each control panel hole. Then, cut away overlay material covering the joystick and button holes. Remove the template and clean off the overlay.

12. Peel off the backings of the 6-button and joystick decals, align over the control panel holes, and press in place on the overlay (refer to the drill hole template for proper placement). Using a knife, trim material from the center hole of the joystick decal.

13. Install the control panel cover (*if required).
