

## OPERATING MANUAL

**TAITO AMERICA CORPORATION**  
660 S. Wheeling Road, Wheeling, IL 60090  
Telephone (312) 520-9280 Telex 253290

## **WARRANTY**

TAITO AMERICA CORPORATION warrants that its printed circuit boards and parts are free from defects in material and workmanship under normal use and service for a period of ninety (90) days from the date of shipment. Seller warrants that its monitors are free from defects in material and workmanship under normal use for a period of thirty (30) days from the date of shipment. The factory also warrants all socketed parts for a period of ninety (90) days when furnished with the game serial number.

If the above products fail to conform to this Warranty Taito America Corporation has the option to repair, replace, or credit the Buyer's account.

The Buyer must notify Taito America Corporation in writing upon finding the defective product. Buyer must also return the defective product prepaid to Taito America Corporation's factory located in Elk Grove Village, Illinois.

If Taito America Corporation determines upon examining the returned product that damage was caused by accident, misuse, neglect, modification, or improper repair or testing, this Warranty will be void.

In no event will Taito America Corporation be held for loss of profits to Buyer.

#### CHARACTERISTICS/FEATURES:

- \* Wide screen:  
The play-field is 3 times larger than that of conventional video games!  
It presents authentic space fighting that has never been experienced in other games.
- \* A variety of unique enemy characters:  
25 different enemy characters in the air.  
25 different enemy characters on the ground.  
26 different huge fish-like battleships awaits the player at the end of each pattern.
- \* New power-up systems:  
There are 24 steps to increase your power (each of air-to-air and air-to-ground attacks and defense).
- \* Different options present a multitude of variations during the game:  
After the player destroys a huge battleship, the choice of the next course is his discretion.

#### HOW TO PLAY:

- \* The first player controls a red battleplane (PROCO).  
The second player controls a blue battleplane (TIAT).
- \* 8 way joystick — controls the movements of the player's battleplane  
Missile button — for mid-air combat  
Bomb button — for on-land combat
- \* A power-up-unit emerges when certain enemies are destroyed. Pick up the power-up-unit. The type of power-up varies according to the color of the power-up-unit.  
red power-up-unit — increases the destructiveness of player's missiles  
green power-up-unit — increases the destructiveness of player's bombs  
blue power-up-unit — increases the player's defensive strength  
(Note: There are 24 levels for each type power-up. The effect lasts until the game-over.)
- \* When the player advances to certain points in the game, a huge fish-like enemy battleship appears. There are 26 types of battleships and each type has its own weak points.
- \* Whenever a huge enemy battleship is destroyed, the player can choose the next zone.
- \* Basically there are 5 types of zones: (1) space cave, (2) city, (3) mountains, (4) Van Allen radiation belt, (5) under ocean water base.
- \* The player loses a battleplane when hitting an (1) enemy, (2) rock, or (3) building.
- \* When all battleplanes are lost or the final zone is cleared, the game is over.
- \* If the player's score ranks within the top 100, he can register his initials.
- \* When 2 players are playing and one player ends his game he can continue by inserting another coin and pressing the start button.

ADJUSTMENT ON GAME PC BOARD  
 (NOTE) BEFORE CHANGING THE SETTINGS OF THE DIP SWITCH, TURN THE POWER OFF.

SETTING OF DIP SWITCH A

## GAME INSPECTION

Examine external cabinet for chips, dents or broken parts.

Open rear access door and check:

    Plug-in connectors to see that they are firmly seated.  
    Speaker connections.

    All player control connections.

    For loose components on P.C. boards.

    Fuses, making sure they are firmly in holders.

    Coin mechanisms.

    For loose foreign objects, especially metal, screws or parts which  
    might cause electrical problems.

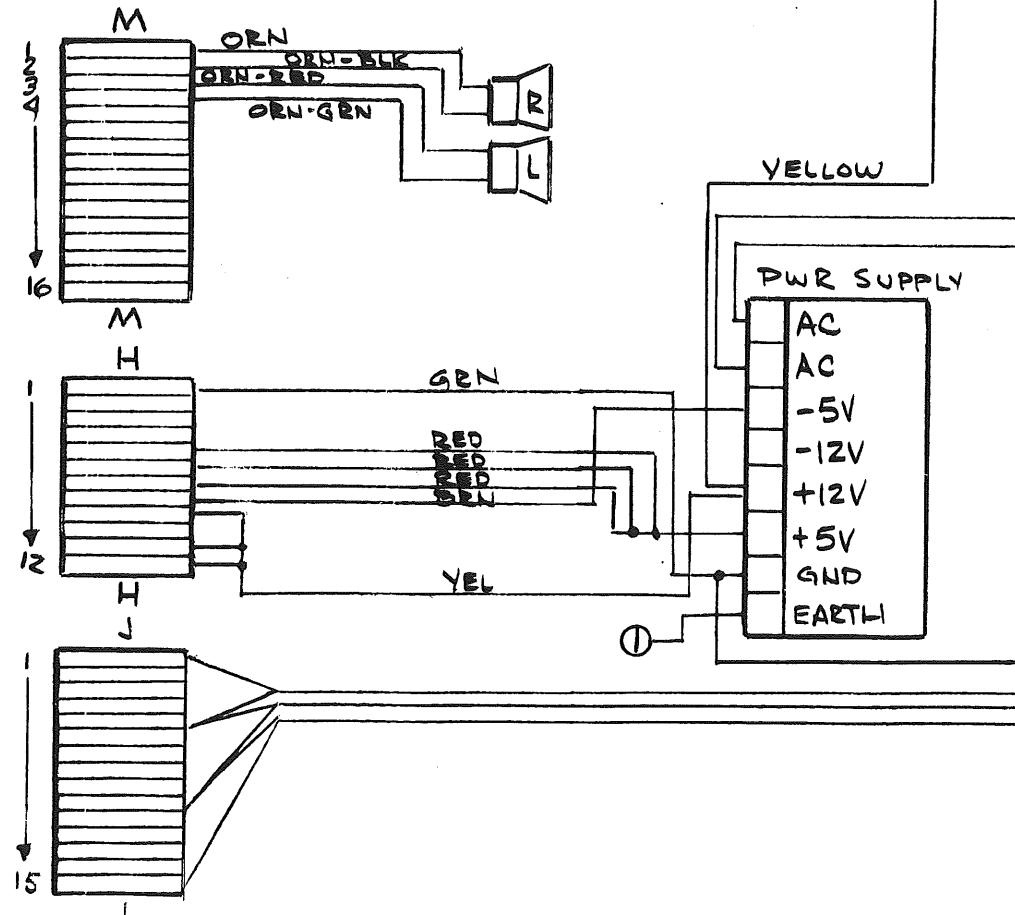

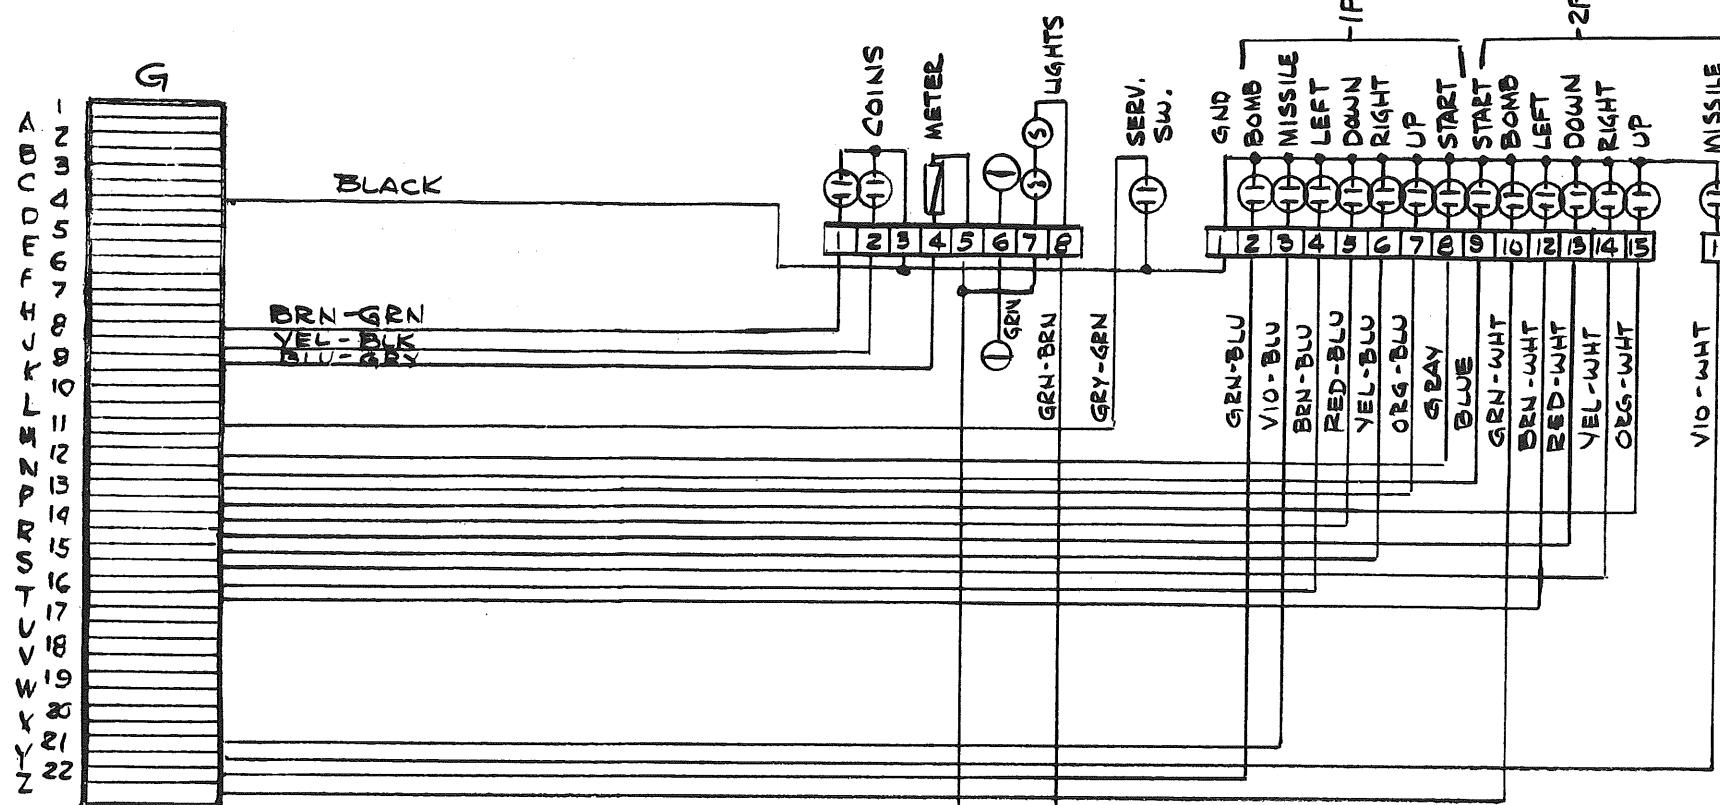

If problems occur or technical assistance is required, contact  
our customer service department at (312) 520-9280.

## POWER REQUIREMENTS

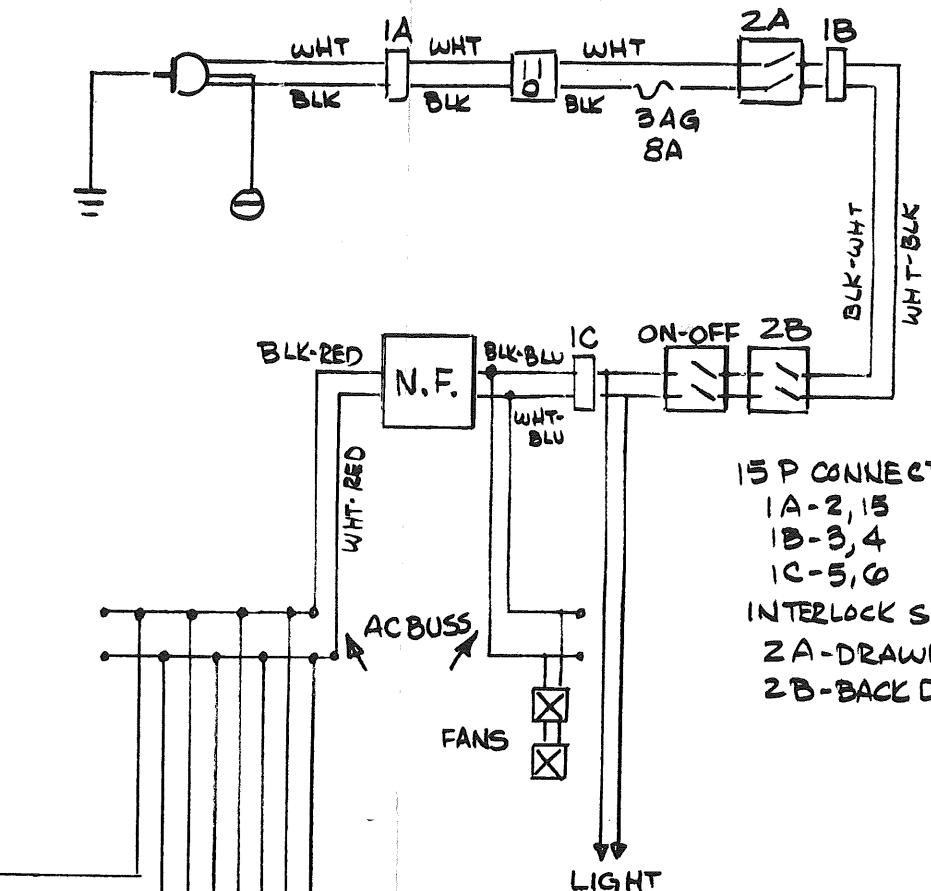

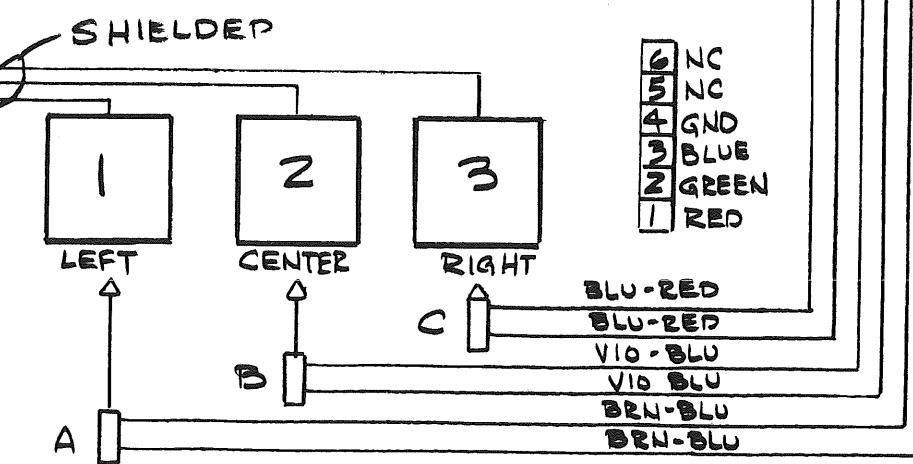

The game is shipped ready for operation at 120VAC, 60Hz with a  
power consumption of approximately 250 watts, foreign shipped  
games operate at 220VAC 50Hz.

### CAUTION

FOR SAFE OPERATION IT IS RECOMMENDED THE CABINET BE GROUNDED.  
THIS GAME IS EQUIPPED WITH A THREE CONDUCTOR POWER CABLE. THE  
THIRD CONDUCTOR IS THE GROUND CONDUCTOR AND WHEN THE CABLE IS  
PLUGGED INTO AN APPROPRIATE RECEPTACLE, THE GAME IS GROUNDED.  
THE OFFSET PIN ON THE POWER CABLE'S THREE-PRONG CONNECTOR IS  
THE GROUND CONNECTION
