IMPORTANT

INSTALLATION INSTRUCTIONS

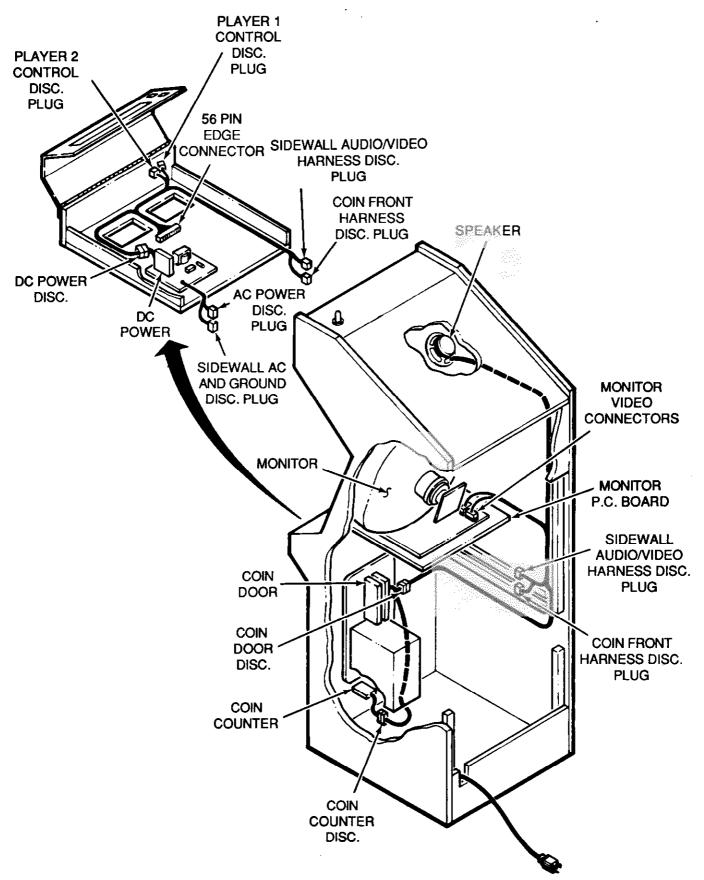

SUPER MASTERS contains a revolutionary new memory system for video games. This memory system is a Floppy Disk System which is housed in the RF Cage. This system allows Sega to give you more memory at a cost effective price.

To insure that no damage occurs to this delicate system during transit, we have packaged the Floppy Disk separately which must be installed upon receipt of the game. Please follow the listed instruction for the installation of the disk.

DISK INSTALLATION

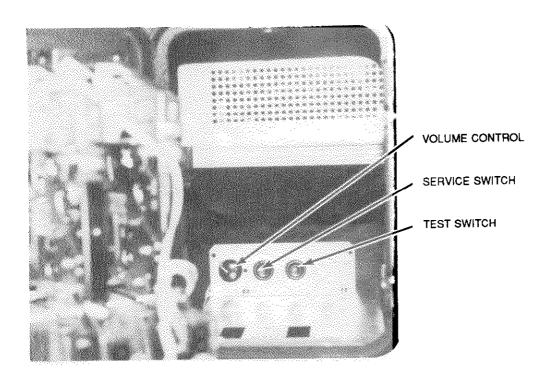

- 1. Open Coin Door and remove Cash Box.
- 2. Open Cash Box and remove Floppy Disk. (NOTE: It is housed in a plastic protection cover.)
- 3. Reach thru the Coin Door opening and unlatch the two spring latches which hold the Control Panel securely to the game. These latches are located on the left and right, inside of the Control Panel Assembly.
- 4. Once the two latches are unlocked, open the Control Panel and pull out the drawer for access to the PCB RF Cage. (Note: Be sure not to over-extend the drawer.)
- 5. Remove the cover of the PCB RF Cage by removing the four sheet metal screws.
- 6. Remove the two screws securing the base of the PCB Assembly.
- 7. Lift the front side of the PCB Assembly. This will allow access to the disk drive, which is located underneath the PCB.
- 8. Remove the disk from the plastic protection case and install it into the disk drive label side up with the metal cover protection slide installed first. The disk should slide in and snap down to indicate that it is securely inserted.
- 9. Replace the two screws that you removed in Step #7 to secure the Wooden PCB base to the RF Cage.
- 10. Replace the lid of the RF Cage using the four sheet metal screws that were removed from the assembly in Step #6.
- 11. Push the drawer back into place, and close and latch the Control Panel.
