● **Electrical Components**

Note: For components marked (※), components equivalent to those listed and made by other companies can also be used.

Component	MCD2/SCD2 (FUNAI)	NCD2/SCD2 (SONY)	Remarks
MAIN CPU	MC68HC000FN12 (※)	Same as on left (※)	
GAME PROCESSOR	CUSTOM CHIP MCE3	Same as on left	
PCM SOUND SOURCE	CUSTOM CHIP RF5C164A	Same as on left	
BOOT ROM (OS)	1M bit	Same as on left	The SONY ROM can be used in SONY and FUNAI units, but FUNAI ROM is exclusively for FUNAI units.
MEMORY FOR MAIN CPU'S PROGRAM	UPD424270LE-80 (※)	Same as on left (※)	
VOLTAGE DETECTOR	MB3790	Same as on left	
MEMORY FOR PROGRAM IN MEGA DRIVE/GENESIS AND CD GRAPHIC PROCESSING	TC511664BJ-80 SOJ (※)	Same as on left (※)	
MEMORY FOR CD ROM DECODER	CXK5864CM-70 (※)	Same as on left (※)	
MEMORY FOR PCM SOUND SOURCE	LH5P832-N-10 (※)	Same as on left (※)	
BACKUP MEMORY	MB8464A-10LL	Same as on left	
CD ROM DECODER	LC89515	Same as on left	
D/A (DIGITAL-TO-ANALOG) CONVERTER	LC7883KM	Same as on left	
	LC78815M	Same as on left	
OP AMP	NJM3403	Same as on left	
	NJM3404	Same as on left	
REGULATOR IC	UPC2405HF	Same as on left	
OSCILLATOR FOR CD DRIVE UNIT OPERATION	XTAL OSC 16.9344MHZ-HC49U	Same as on left	
	CER OSC 4.19MHZ	Built into CD drive unit.	
OSCILLATOR FOR DIGITAL UNIT OPERATION	XTAL OSC 50MHz JXO-7	Same as on left	
DIGITAL SIGNAL IC	CXD1167Q	CXD2500BQ	
MECHANISM CONTROL μP	UPD75006	CXP5084-580Q	
SERVO SIGNAL IC	CXA1082	Built into CD drive unit.	
SERVO DRIVE IC	AN8388	Built into CD drive unit.	
RESET IC FOR CD DRIVE UNIT	PST529E MM3P	Same as on left	
RF AMP	CXA1081	Built into CD drive unit.	
PCM BOARD	Yes	Built into MAIN board

MEGA-CD2/SEGA-CD2 PICKUP UNITS
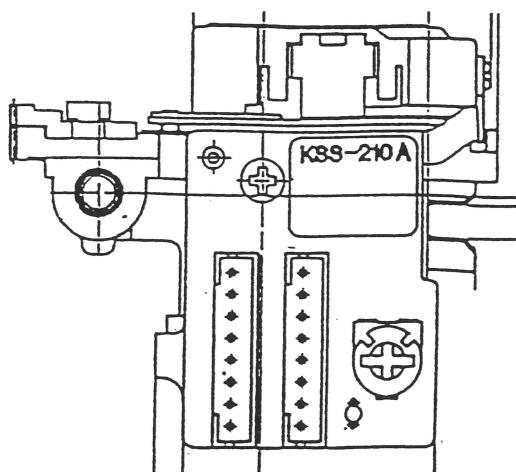

1) MEGA-CD2/SEGA-CD2 pickup units.
   ① KSS-210A
   ② SOHOT4
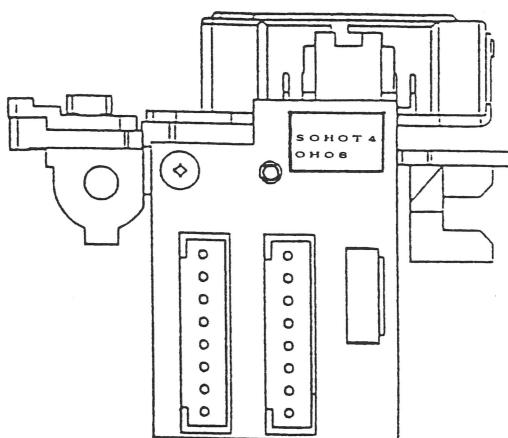

2) How to discriminate
   Check the label indication to discriminate the pickup units (see the figure below).

① K S S − 2 1 0 A   ② S O H O T 4

3) Differences of electrical parts between KSS-210A and SOHOT4
   The KSS-210A and SOHOT4 use the different electrical parts (see Table below).

| Circuit No.	① KSS-210A	② SOHOT4
Chip Resistors		
R414	1.8 kohm	2.2 kohm
R421	220 kohm	87 kohm
R422	150 kohm	Not used
R423	220 kohm	270 kohm
R424	15 kohm	20 kohm
R426 .	4.7 kohm	3.3 kohm
R448	91 ohm	82 ohm
R449	10 kohm	0 ohm
R450	33 kohm	Not used
R491	150 kohm	180 kohm
Chip Capacitors		
C428	0.056 μF	Not used
C451	15 pF	8 pF
Electrolytic Capacitor		
C412	22 μF/6.3 V	47 μF/6.3 V
Mechanism Assembly	CD-775	CD-776
IC900 Heat Sink	Heat Sink 2 MEGA CD2	Heat Sink SPL 1
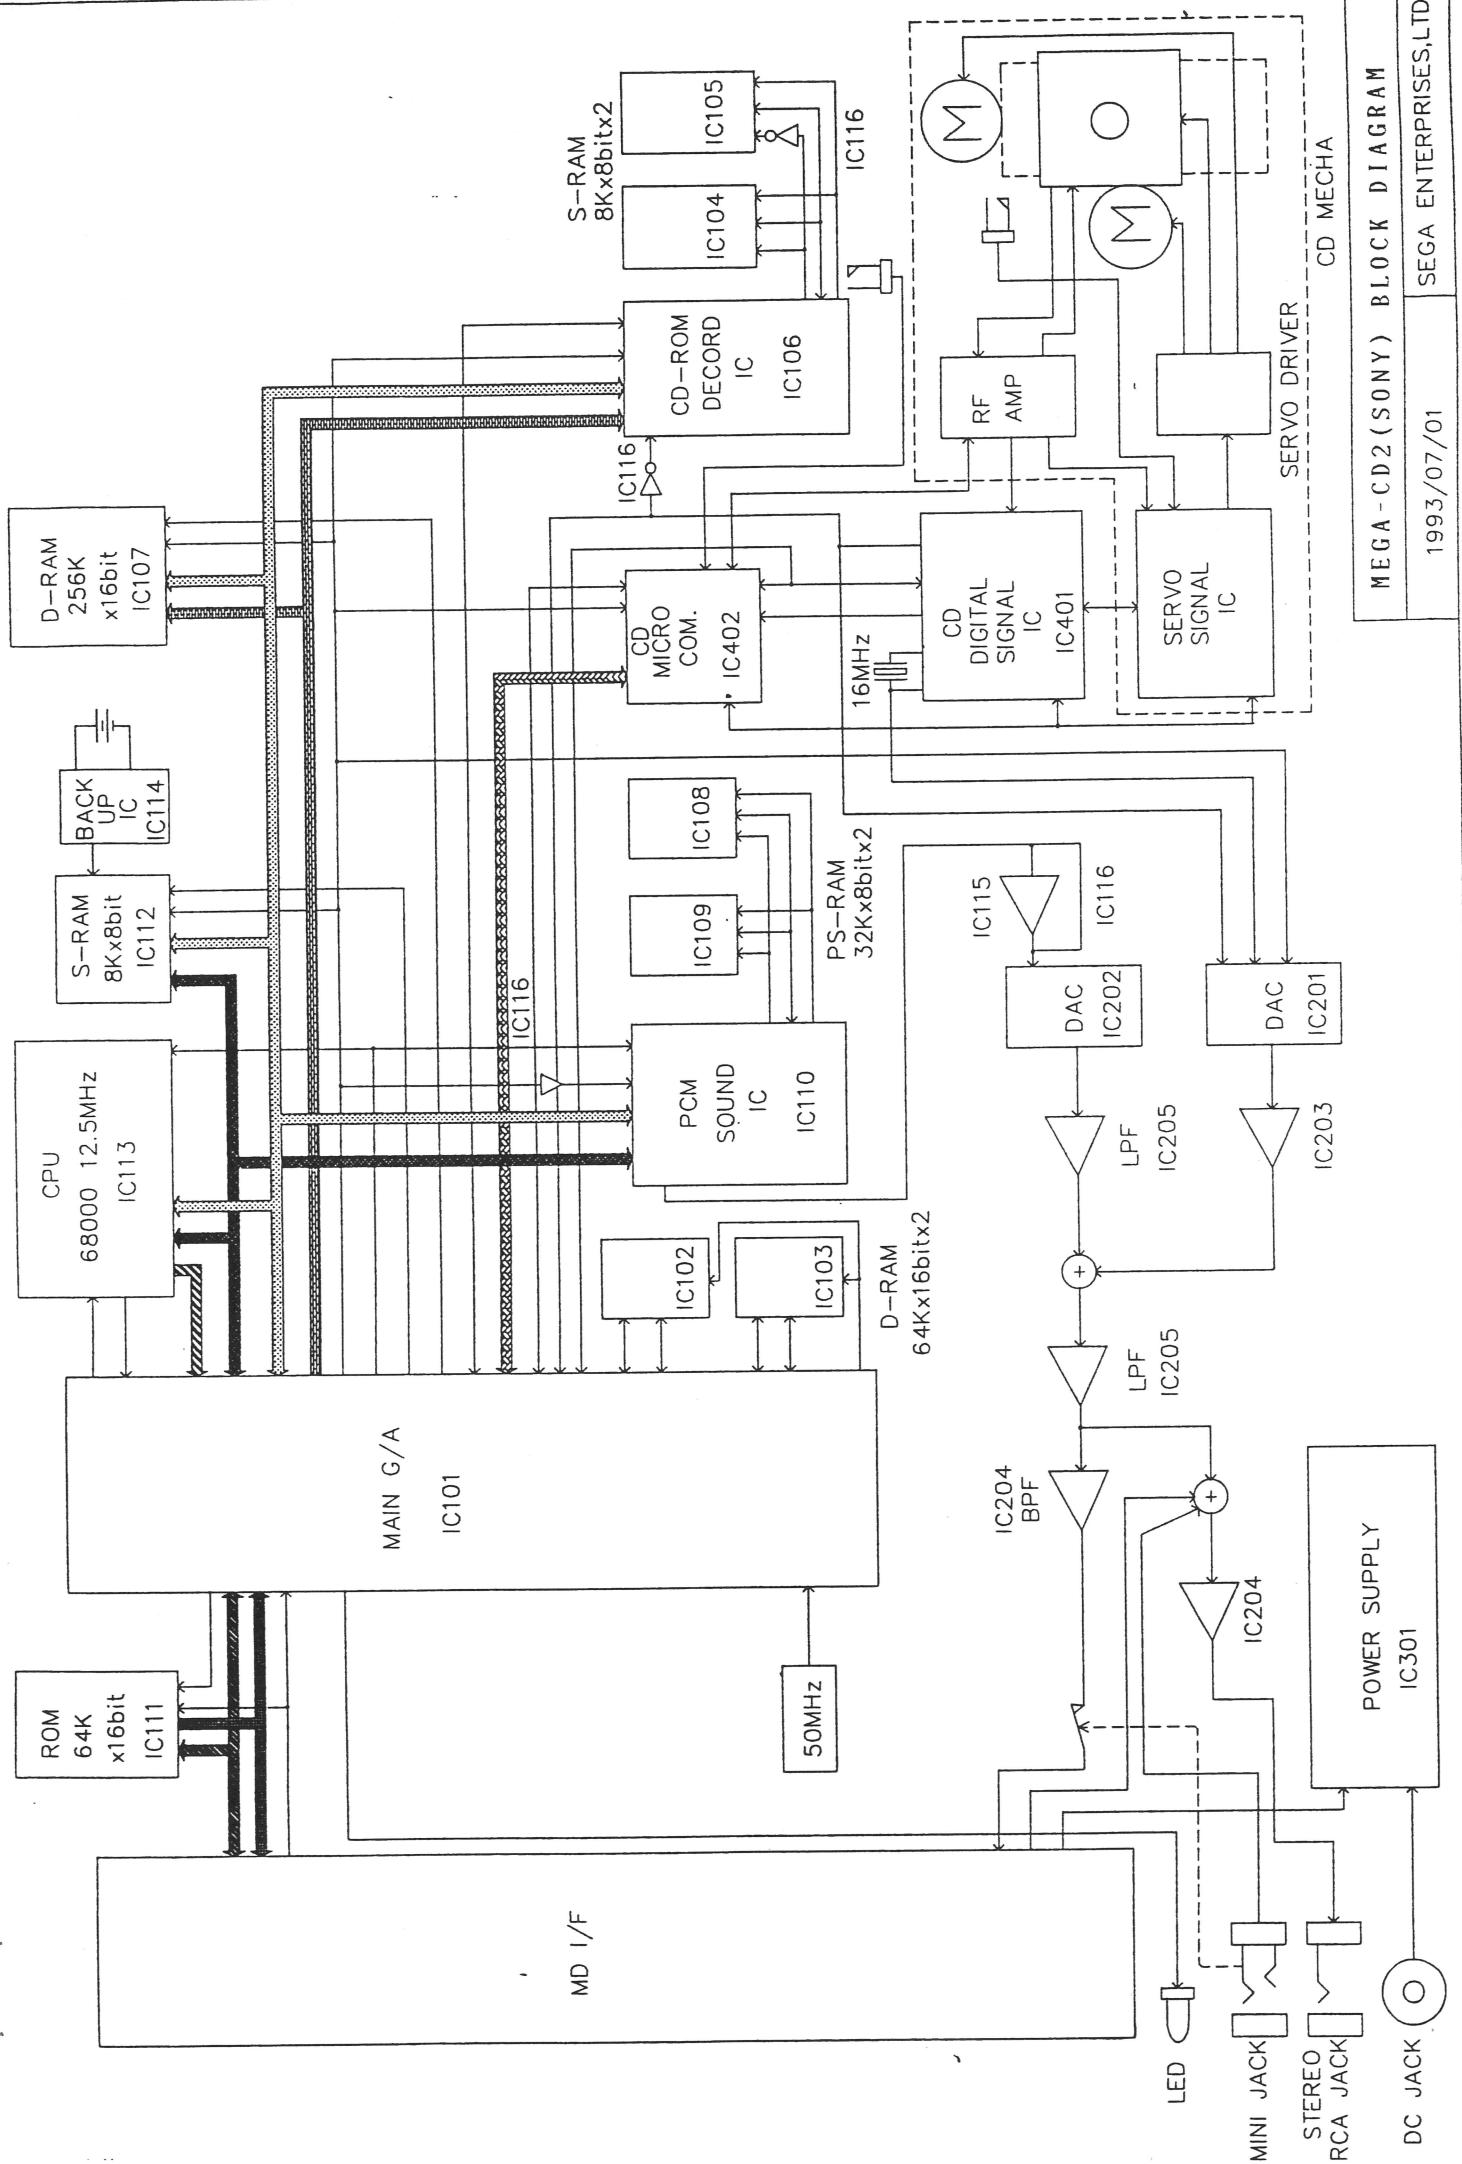

4) Tracking gain adjustment value
   The KSS-210A and SOHOT4 have different tracking gain adjustment values (see Table below).

	KSS-210A	SOHOT4
Tracking gain adjustment value	1 kHz/0 dB	800 Hz/0 dB

Differences in MEGA-CD2/SEGA-CD2 between Works in China and Japan

Item	Works in Japan	Works in China
Package size of all chiip resistors and capacitors	1.6 x 0.8 mm	2 x 1.25 mm
PCM board	Yes	Integrated with main board
IC952 (74 AC 74)	No	Yes
C951	No	Yes
C952	No	Yes

Main parameters :

(1)	playing time single side, 2 channels	approx. 60 min.
(2)	scanning velocity (2 channels)	1.2 - 1.4 m/s
(3)	sense of rotation seen from reading side	counter clockwise
(4)	track pitch	1.6 μm
(5)	diameter of the disc	120 mm
(6)	thickness of the disc	1.2 mm
(7)	diameter of centre hole	15 mm
(8)	starting diameter of program area	50 mm
(9)	number of channels	2 and/or 4 simultaneously sampled
(10)	sampling frequency	44.1 KHz
(11)	quantization	16 bits linear/channel 2's complement
(12)	channel bit rate	4.3218 Mb/s *VCO*
(13)	pre emphasis	no or 50/15 μs

DISC SPECIFICATION

1. Outer diameter

1.1. outer diamter
of disc
120 ± 0.3 mm

2. Centre hole

2.1. diameter
15 $^{+\ 0.1}_{-\ 0}$ mm

RECORDED AREA

3. Recorded area

3.1. starting diameter
of program area
50 $^{+\ 0}_{-\ 0.2}$ mm

3.2. max. diameter
of program area
116 mm

3.3. max. starting
diameter of lead-in
area
46 mm

3.4. min. outer diameter
of lead out area
outer diameter of
program area plus
1 mm

4. Track pitch

4.1. track pitch   1.6 ± 0.1 μm
pit width   0.4 ~ 0.5 μm
pit depth   110 nm

$$T = \frac{1.25 \times 10^{6}\,(\mu m/s)}{4.3218 \times 10^{6}\,(Hz)}$$

$$\fallingdotseq 0.29\ (\mu m)$$
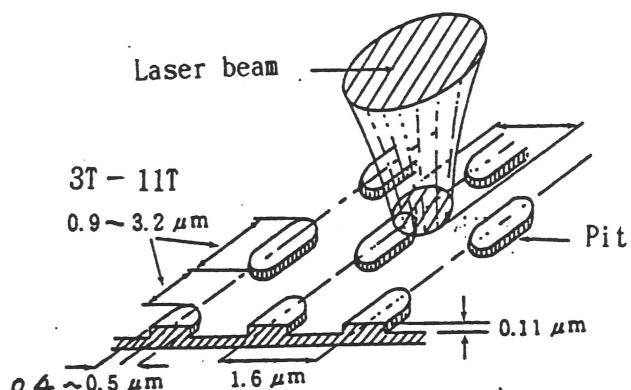

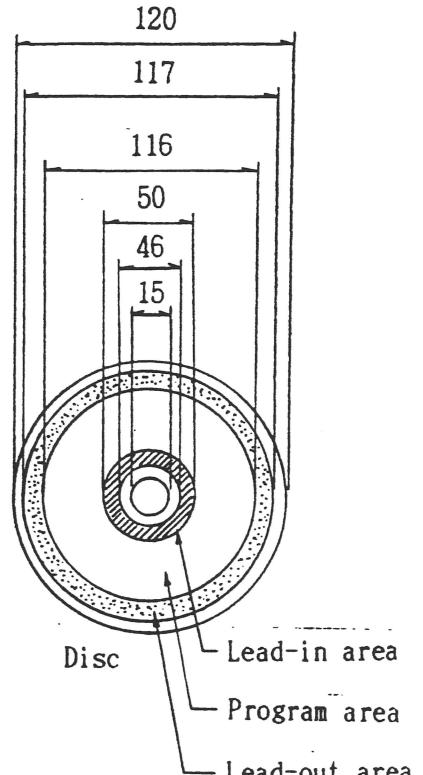

5. Rotation
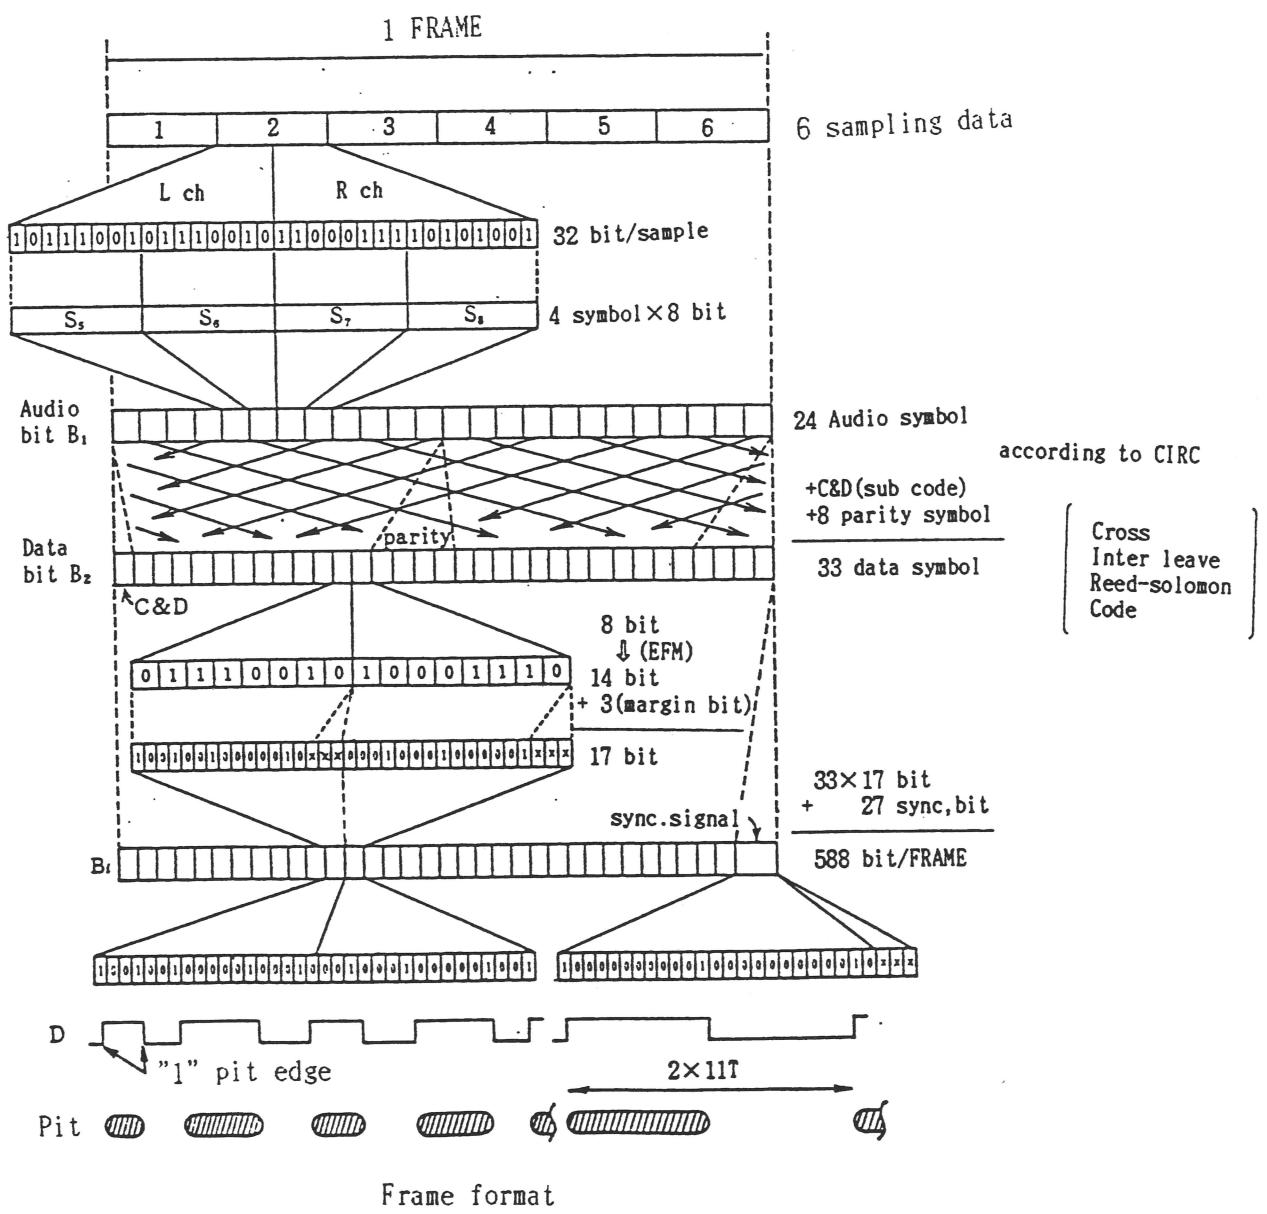

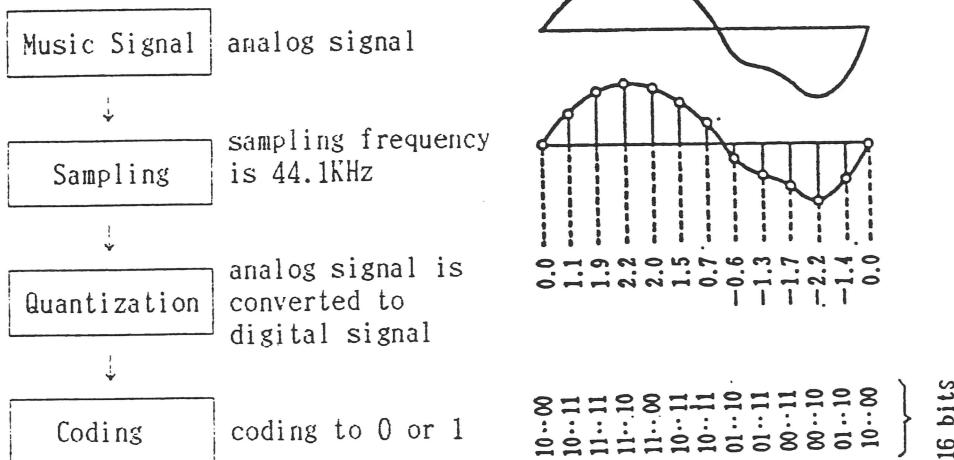

5.1. sense of rotation   counter clockwise

5.2. scanning velocity   1.20 - 1.40 m/s
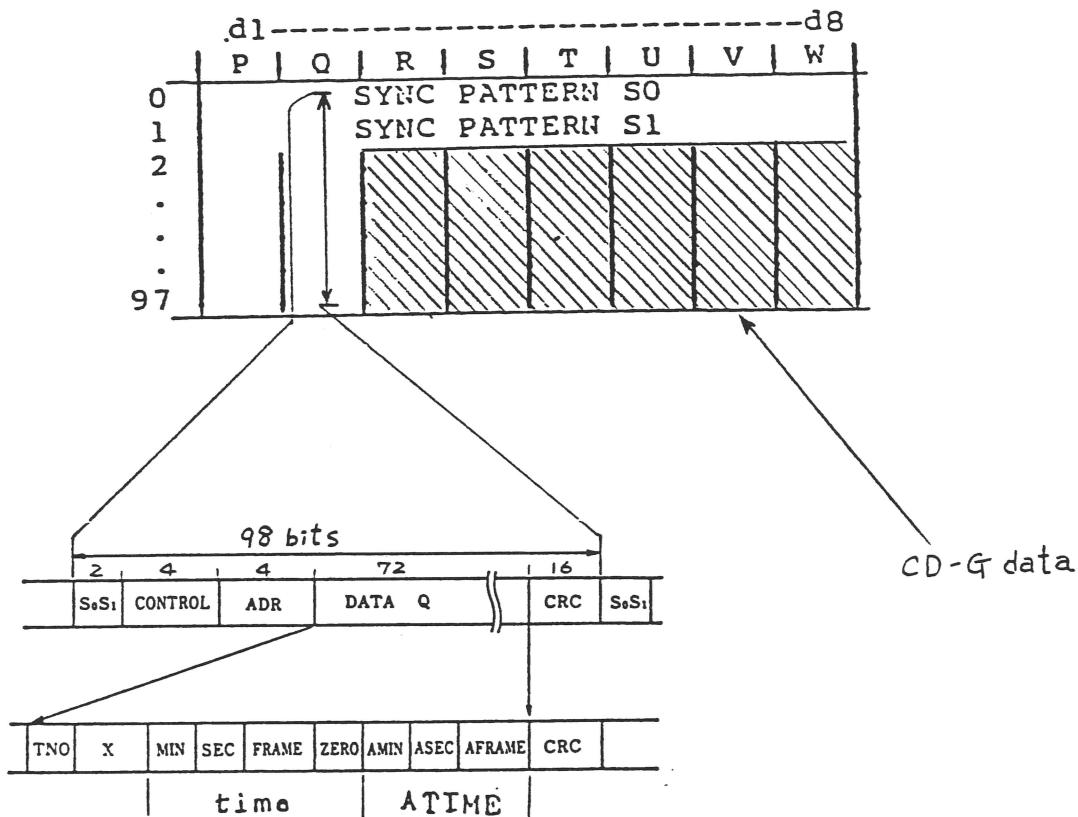

6. max. vert. deviation   ± 0.5 mm

7. max eccentricity of track radius   ± 70 μm

Disc — Lead-in area
— Program area
— Lead-out area
